

SCENE 8

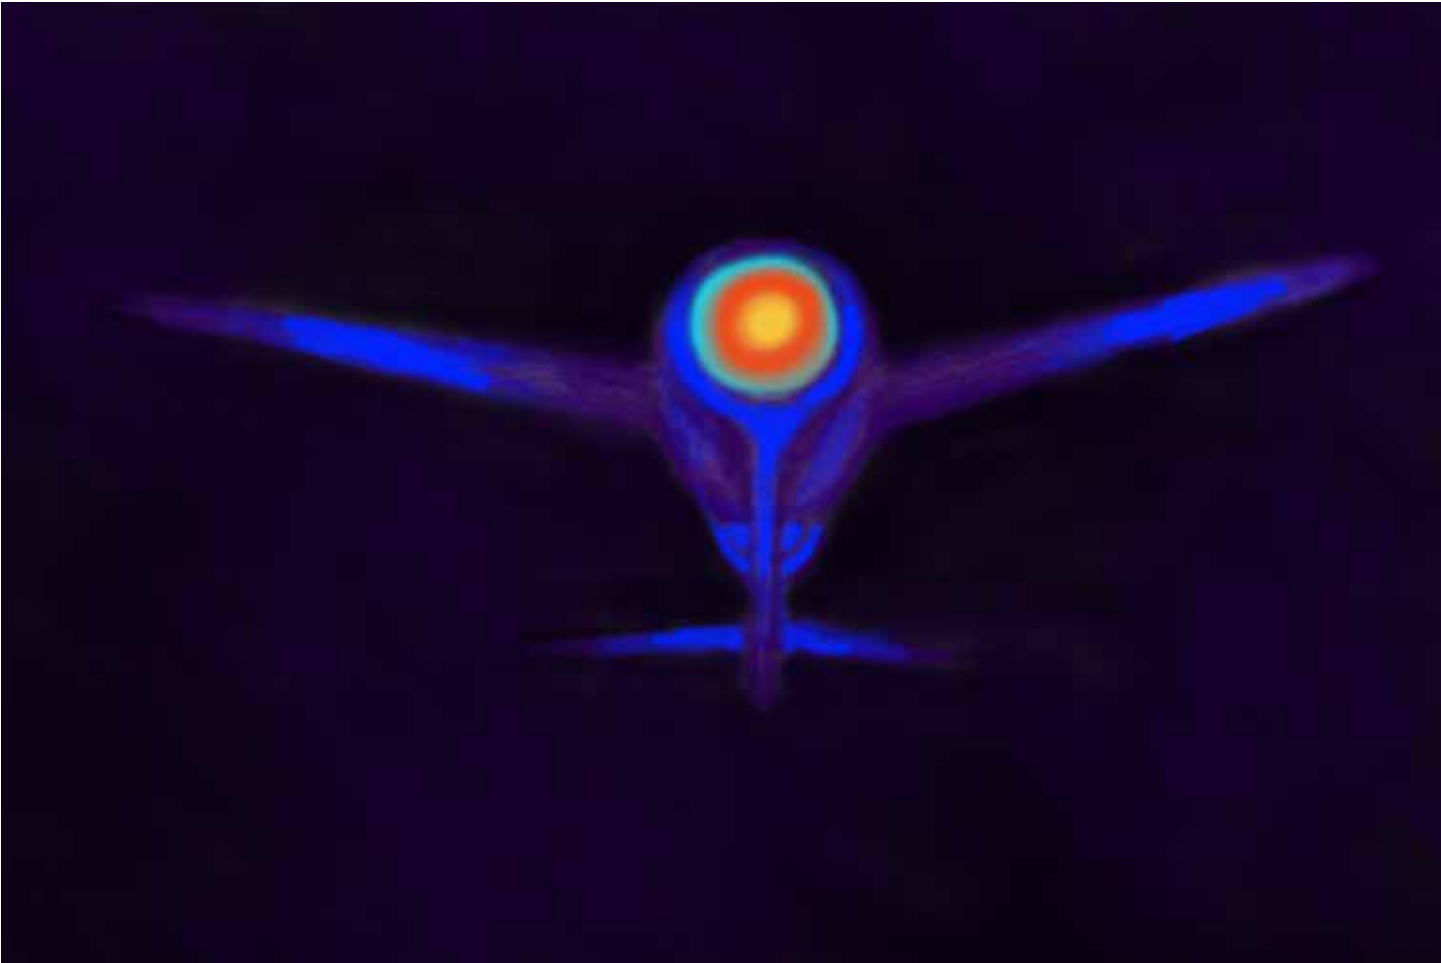

WEAKNESSES AND STRENGTHS

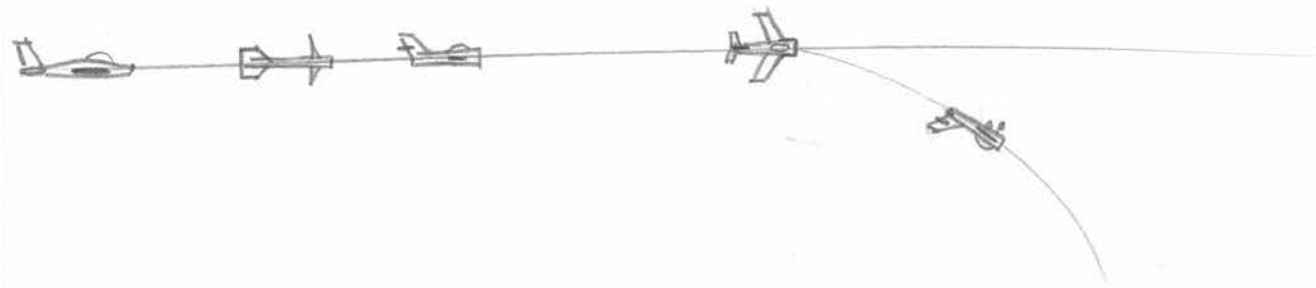

VO: "The AIM9-B Sidewinder had a modest 11 degree/second seeker tracking rate that limited the weapon to non-maneuvering targets."

VO: "In fact, the modern missile was a strictly tail aspect weapon.
And the early MiG-17A had no afterburner. It produced a limited heat source.

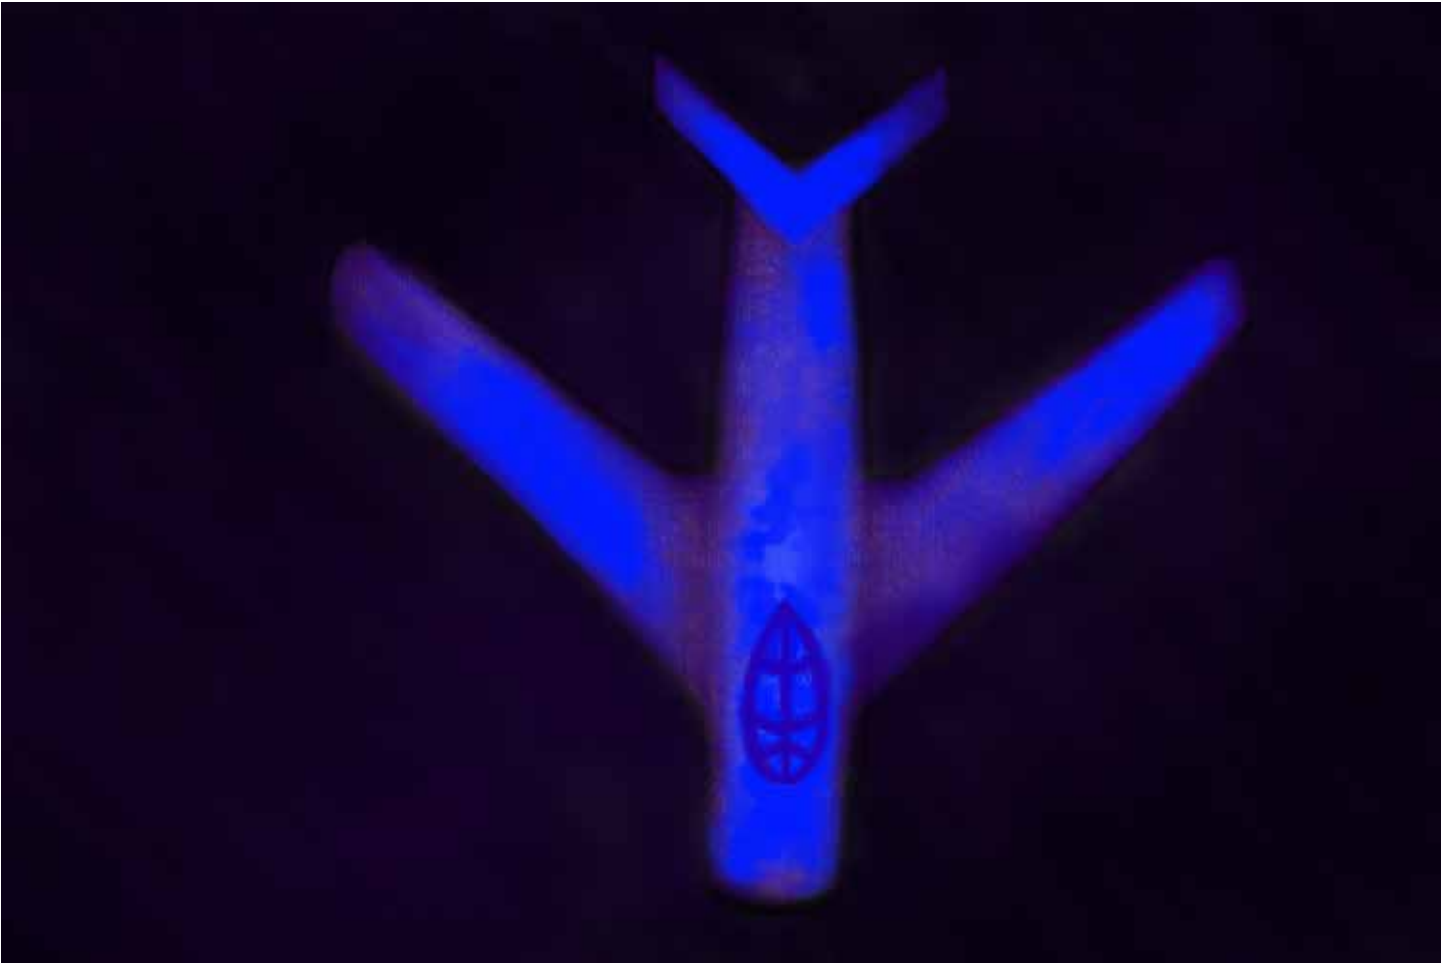

VO: "In fact, the modern missile was a strictly tail aspect weapon.
And the early MiG-17A had no afterburner. It produced a limited heat source.

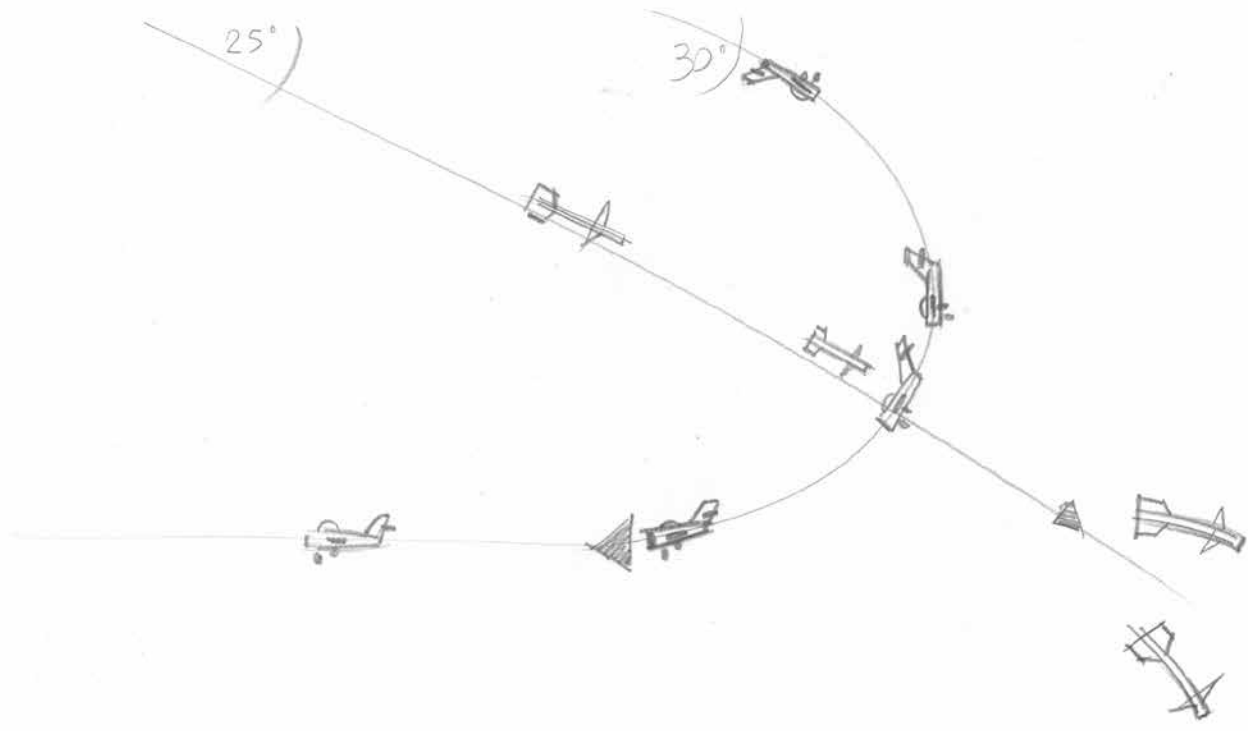

VO: "When Capt Tran Hanh flew down and performed a split S..."

VO: "... the Sidewinder seeker became blind"

VO: "... the Sidewinder seeker became blind"

VO: "Moreover, the supersonic speed of the missile was only effective in a straight flight."

Gen. Tran Hanh: "At angular velocity it can't travel as fast as MiG-17".
